

Quiet Clutch—Runs in Oil

The clutch of the new Maxwell operates in a bath of oil. This makes it remarkably smooth and velvety in engagement, and eliminates 80 per cent. of noise when the gears are shifted.

Designers of the highest-priced cars agree that the clutch should run in oil.

The Maxwell clutch and transmission mechanism is fully enclosed.

We are waiting to take you for a test ride in the car that has broken all low "First-Cost" records, and is breaking all low "After-Cost" records.

Fire Lands.
The phrase "fire lands" originated in a passage of early history, which also gave rise to the term "western reserve." After the Revolutionary war, when the colonies consented to cede their claims to western lands to Congress, Connecticut reserved from her cession a tract embracing a large part of northern Ohio. The tract thus reserved included the present counties of Trumbull, Geauga, Portage and Ashland and became known as the western reserve. It was settled chiefly by emigrants from Connecticut and was sometimes called New Connecticut. In promoting the settlement of the land Connecticut reserved half a million acres from the western end of the tract for bestowal upon her citizens who had suffered losses during the war, and the lands embraced in this special reserve were called "sufferers' lands" and later "fire lands," because most of the sufferers had been losers by fire. In early times the phrase "fire lands" was sometimes used in deeds in describing the location of land in the tract referred to. — Philadelphia Press.

Love of Money.
The love of money can hardly be the root of all evil, for it is only one perverse passion out of many. But there is a kind of decorum about money which makes the love of it peculiarly dangerous, since it conceals from the lover the nature and effects of his passion. If a man wants too much food, he is evidently greedy. If a woman wants too many clothes, she is evidently vain. But money is not a thing, like clothes or food, that can be enjoyed by itself. It is only a means of getting things that can be enjoyed, and so greed for money is not a direct greed, but indirect. It is a civilized means of conducting the struggle for life, which to a great extent conceals from those who use it the ugliness and the animal nature of that struggle. It is, in fact, a kind of diplomacy, politely conducted, behind which there is war. But the diplomats often do not see the war. — London Times.

Chesterfield on Toothbrushes.
When did the English first adopt the toothbrush habit? In "Esmond" Thackeray makes Lord Caspewood spend "a tenth part of his day in the brushing of his teeth and the oiling of his hair," and in doing so the novelist commits a double anachronism. During the first half of the eighteenth century all fine gentlemen wore wigs and had no use for oil on their hair, while the toothbrush was so late as 1754 unknown to Lord Chesterfield. Writing to his son, Chesterfield says: "I hope you take great care of your mouth and teeth, and that you clean them well every morning with a sponge and tepid water, with a few drops of argemone water dropped into it. I do insist upon your never using those sticks, or any hard substance whatever, which always rub away the gums and destroy the varnish of the teeth." — London Graphic.

Porpoise Jaw Oil.
Practically all the porpoise oil used in this country, even if not in the world, for lubricating watches and other delicate instruments is made near New Bedford, Mass., which many years ago was important as a whaling port. The product is taken from the jaw and certain other parts of the animal, which is caught especially for this purpose. When the industry was in its infancy whalers were depended upon to supply the porpoise, but now the manufacturers maintain a fishing department, which follows the schools of porpoise migrating along the coast and furnishes a continual supply of them. The history of the New Bedford industry reaches back to the early part of the nineteenth century to a watch tinker who regulated and cleaned the timepieces of the whalers. — Popular Mechanics.

He Taught Him.
Tells from the nursery brought the mother who found the baby gleefully pulling small Billy's curls.
"Never mind, darling," she comforted. "Baby doesn't know how it hurts."
Half an hour later wild shrieks from the baby made her run again to the nursery.
"Why, Billy," she cried. "What is the matter with the baby?"
"Nothing, muzzer," said Billy calmly, "only now he knows" — Harper's Weekly.

Injured Innocence.
Irate Parent—What do you mean by holding Willie Jones down in the mud and skinning his nose?
Young Culprit—It wasn't my fault he got his old nose skinned. The mud where I had him was soft, but he kept wriggling around and bit his back on a rock. — Richmond Times-Dispatch.

Swelled.
Mr. Woggs—I'm through with Bump. I told him we are going to name our baby after some great personage and asked him for a suggestion. Mrs. Woggs—What did he say? Mr. Woggs—He said, "Name it after ours." — Boston Journal.

Why They Sting.
Bill—You never see a bee trying to extract honey from the artificial flowers on a lady's hat. Jill—No, because the bees know there is more sweetness under the hat. — Yonkers Statesman.

Devotion.
"He's a devoted husband."
"Very. When she's away he even washes the dishes after every meal he gets for himself." — Detroit Free Press.

Think of your wonderful immunity from harm if you wind your own business. — Loomis.

To Drive Out Malaria
And Build Up The System
Take the Old Standard GROVE'S TASTELESS CHILL TONIC. You know what you are taking, as the formula is printed on every label, showing it is Quinine and Iron in a tasteless form. The Quinine drives out malaria, the Iron builds up the system. 50 cents.

India's Aluminum Wealth.
India offers a great field for future supplies of aluminum. There are great deposits of laterite and bauxite from which aluminum is derived. It is said that the Indian product could be placed on the market at a figure but little more than half that of the present quotation. The use of this metal is handicapped by the cost at present, and if the metal could be secured at a lower cost its field of usefulness would be greatly expanded. There are many comparatively accessible points where factories for the extraction of aluminum could be located.

Keep Stomach Sweet—Liver Active—Bowels Regular

Languages.
The verse found in Genesis 11, "And the whole earth was of one language and of one people," has given rise to much speculation as to the language spoken on the earth previous to the "confusion of tongues." According to many authorities, Hebrew was the language spoken by Adam, while others state that Hebrew, Arabic and Chaldee are simply dialects of the original tongue. The Persians assert that there were three primitive languages. The Arabic, being the most persuasive, was used by the serpent in addressing Eve; the Persian, being the most poetic, was spoken by Adam and Eve, and the Turkish, being the most menacing, was employed by the angel when driving the guilty pair from the garden of Eden.
Herodotus says that Psammetichus, king of Egypt, wishing to learn the language that would naturally be spoken by a person, caused two infants to be carefully guarded and kept from all verbal intercourse. When brought before him the first word the children uttered, wherever it was at once ascertained the Phrygian was the primeval or oldest tongue. — Philadelphia Press.

For the Ultra Precise.
Professor Thomas R. Lounsbury said at Cambridge in a talk on English: "But precision can be carried too far. The ultra precise, even when logically right, are really wrong."
"An ultra precise professor went into a hardware shop and said:
"Show me a shears, please."
"You mean a pair of shears, don't you?" said the dealer.
"No," said the professor. "I mean what I say. I mean a shears."
"The dealer took down a box of shears.
"Look here, professor," he said. "Aren't there two blades here? And don't two make a pair?"
"Well, you've got two legs. Does that make you a pair of men? And the professor smiled at the dealer triumphantly through his spectacles.
"He was logically right, but, really, he was wrong." — Philadelphia Bulletin.

What It Is Like to Fly.
In "Air Craft in the War," by Claude Grahame White and Harry Harper, an answer to the question "What is it like to fly?" is brief:
"The question has lost novelty, yet it has never been answered—never, that is to say, in a manner wholly convincing. The reason is that the sensation is indescribable—'like nothing else on earth,' has a passenger said. If you can imagine yourself gliding over a smooth surface of ice on skates you cannot feel and which make no noise, that may convey some faint idea perhaps of the feelings you experience after leaving ground. You are supported on something, yet you are not supported. You look down, and there is nothing below you but an empty void. Yet the machine rides firmly and securely, as though you were in a motor-car on the smoothest road."

What Is a Placer?
A placer is an unconsolidated deposit accumulated by mechanical processes, carrying one or more minerals in commercial quantities. All placers are secondary deposits—that is, the material of which they are composed was originally derived by erosion of bed-rock. Although it is undoubtedly true that under certain conditions nuggets of placer gold have been enlarged through chemical precipitation, yet this action is a negligible quantity in placers. Placers may be derived solely by rock weathering without water sorting, but more commonly are the result of water transportation, sorting and deposition. Many of the richest placers are those formed by the erosion of older placers and the reconcentration of their gold.

George's Father.
Augustine Washington, the father of George Washington, was engaged in 1732 in making pig iron at Accokeek furnace, in Stafford county, Va., about fifteen miles from Fredericksburg, when his famous son was born. This furnace had been built by the Principio company, composed of English capitalists, as early as 1728 on land owned by Augustine Washington, aggregating about 1,600 acres and containing iron ore. Mr. Washington becoming the owner of one-sixth of the furnace property in consideration of the transfer of his land to the company.

A Chinese Gutenberg.
There is pretty good evidence of a Chinese Gutenberg, one Pi Ching, who in 1041 carved cubes of porcelain paste with Chinese characters, afterward baked them and "set" the porcelain type by help of parallel wires on a plate of iron in a cement bed. It is certain that the art of printing was known in the Celestial empire for centuries before it came to light in Europe.

Feminine "Short and Ugly."
"You say Mrs. Gadders and Mrs. Plimpy exchanged the short and ugly word?"
"That's what they did."
"Shocking! Was it 'lar'?"
"No. 'Cat'." — Birmingham Age-Herald.

Paradoxical Condition.
Mrs. Exe—Your maid is too familiar. You should make her keep her place.
Mrs. Wye—If I made her keep her place she'd quit her job. — Boston Transcript.

True.
"Misery loves company."
"Yes, and some folks persist in acting as though they were married to it." — Detroit Free Press.

Whenever You Need a General Tonic
Take Grove's
The Old Standard GROVE'S Tasteless Chill Tonic is equally valuable as a General Tonic because it contains the well known tonic properties of QUININE and IRON. It acts on the Liver, Drives out Malaria, Enriches the Blood and Builds up the Whole System. 50 cents.

Cities With Nine Lives.
The teaching of history is that a city is hard to kill. For instance, London has been decimated five times by plagues, in addition to visitations of typhus, cholera and other epidemics. She has been burned over or less several times. Paris has gone through eight sieges, ten famines, two plagues and one fire which devastated it. Rome has been swept by pestilence no fewer than ten times. She has been twice burned and six times driven to submission by starvation. Constantinople has been burned out nine times and has suffered from four plagues and five sieges.

Southern Railway New Trade Mark.

The Southern Railway Company has adopted a new and attractive trade mark as shown above. The design "SR" is symbolic to the name of the road and the wording "The Southern Serves the South" is suggestive of the many lines operated by the Southern Railway throughout all of the states south of the Ohio and Potomac and east of the Mississippi rivers.

There is hardly a city or town of importance throughout the entire south that is not connected with the balance of the south, either directly by the Southern Railway's own trains or by sleeping car lines over other roads in connection with Southern Railway, via some adjacent junction point. On this account the title "The Southern Serves the South" was adopted as being appropriate.

Southern Railway spends about \$200,000 a year in advertising and a great deal of this advertising is done in the Northern, Eastern and Western sections of the country so as to attract people into the South, and on all of this advertising matter this trade mark will appear hereafter.

"Money."

The mind makes it and under the terms of the CONTINENTAL MORTGAGE COMPANY you can secure it at 6 per cent for any legal purpose on approved real estate. Terms easy, tell us your wants and we will co-operate with you.
